Information and network security

Assignment 1

Student:

Wala' Essam Ashqar

Registration number:

**12027854**

-2024-

This is the GUI:

In this I choose 1 bit and then encode the result appear and when I click decode so he appears the text on the result image.
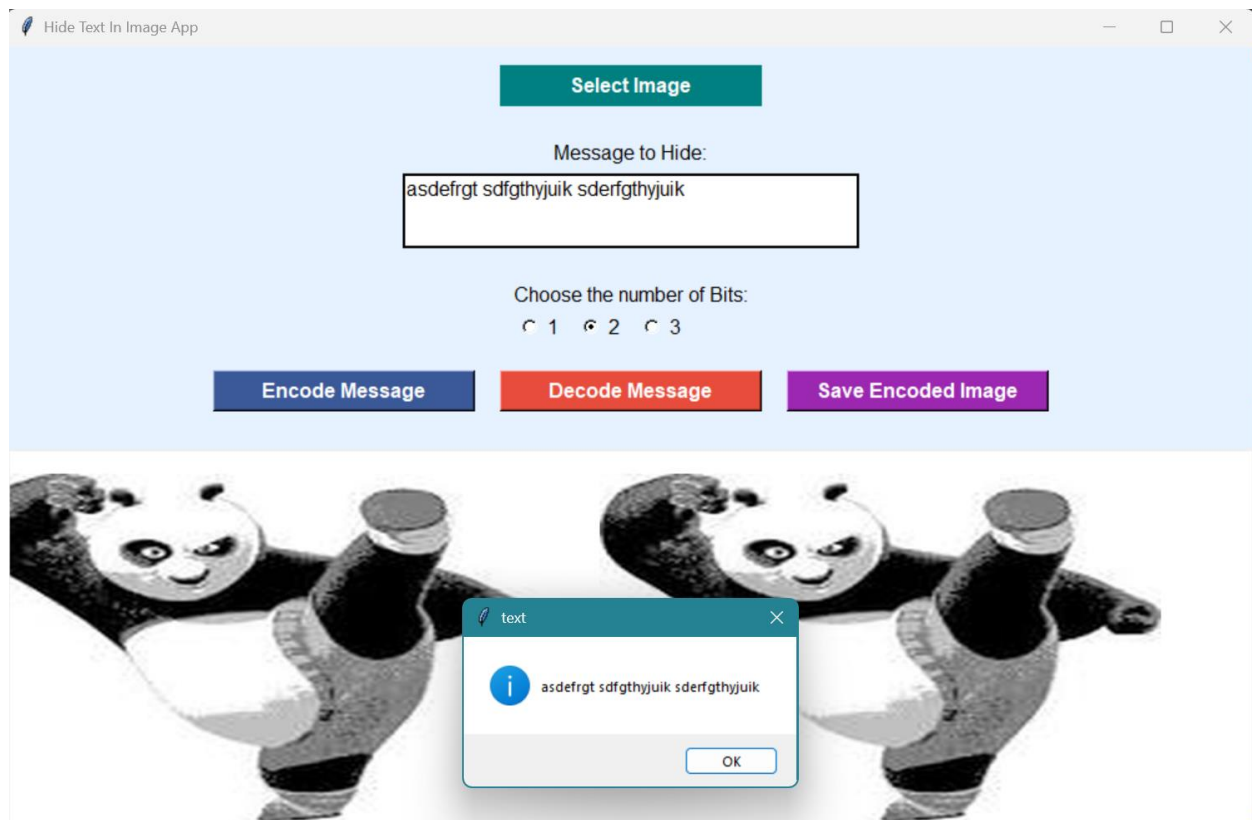

In this I choose 2 bits and then encode the result appear and when I click decode so he appears the text on the result image.
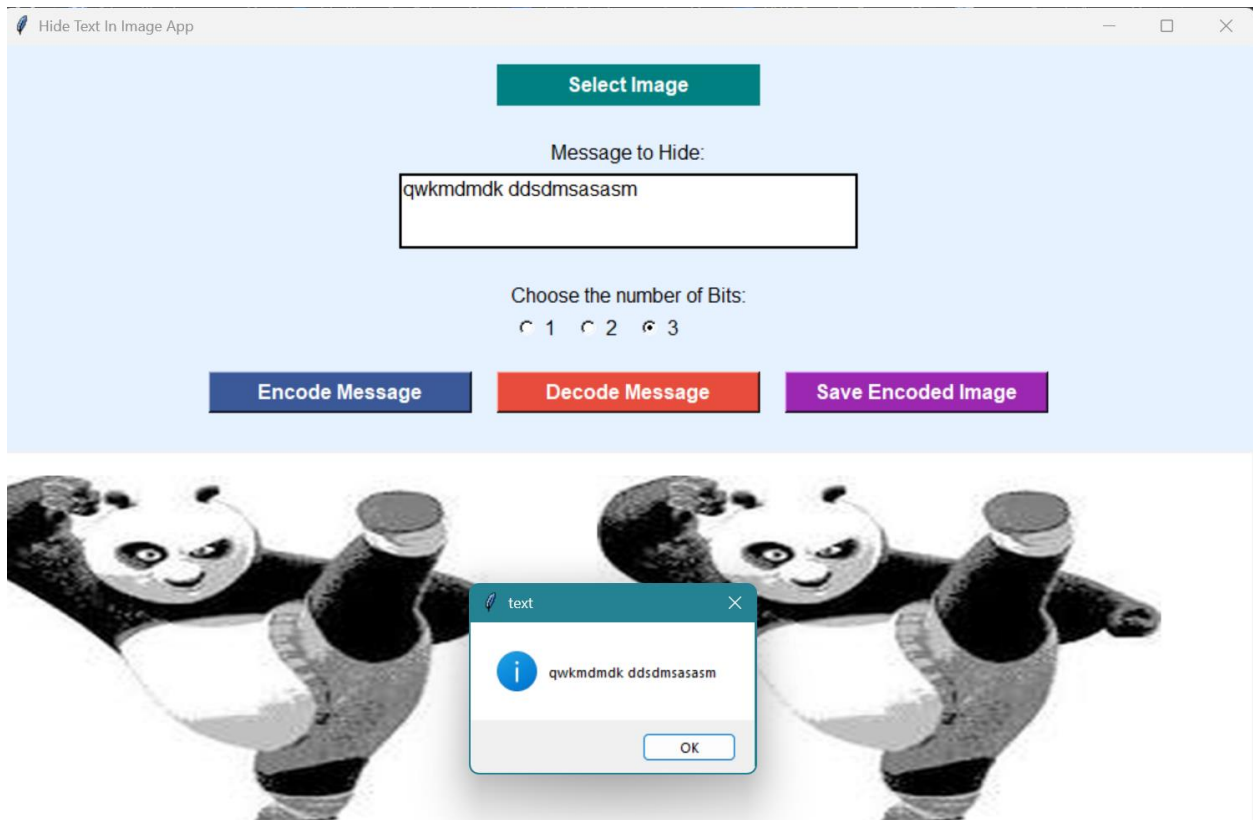

In this I choose 3 bits and then encode the result appear and when I click decode so he appears the text on the result image.

Here I choose an image from the results folders and make directly encode so he appears the text only when I choose 1 bit because when I hide the text, I choose 1 bit.
